ASSETCROSS™ SOFTWARE TAKES THE TROUBLE OUT OF ASSET TRANSFERS!

Finding solutions to tedious transfer processes saves time and money!

AssetCross™ is a fantastic new software product from Chi-Star TechnologySM that will help companies eliminate wasted time and money spent on manually transferring assets between books. Cut through the confusion of lost asset trails and endless hours of data entry! The AssetCross™ program is designed specifically to complement the Oracle® E-Business Suite. Your reliable programs stay the same, except now you are able to streamline data entry.

How much time and money is spent on manually retiring assets, only to recreate them in new books? How much frustration is caused by lost audit trails from retired assets? How many mistakes might be made by manually calculating assets in a new book's currency? Time is money, and both add up! Save valuable resources by adding AssetCross™ into your current Oracle E-Business Suite implementation.

But how does it work? After years of telling companies the bad news about the need to manually enter assets between books, Mr. Brian Bouchard, founder and president of Chi-Star TechnologySM took matters into his own hands and revolutionized the transfer process by automating it. With this exciting new product, not only are audit trails maintained, but the AssetCross™ software will transfer single or multiple assets between corporate depreciation books, transfer full or partial (cost or units) assets, and translate transferred amounts to the receiving depreciation book's currency. The result is far fewer headaches, more time spent on critical projects, and more money in the bank! By providing practical solutions for common problems, whether you are a mid-sized company or a large one, Chi-Star TechnologySM and AssetCross™ are the new must-haves in the business world!

Chi-Star is a member of Oracle PartnerNetwork.

About the Oracle PartnerNetwork

Oracle PartnerNetwork is a global business network of more than 19,500 companies who deliver innovative software solutions based on Oracle software. Through access to Oracle's premier products, education, technical services, marketing and sales support, the Oracle PartnerNetwork program provides

partners with the resources they need to be successful in today's global economy. Oracle partners are able to offer their customers leading-edge solutions backed by Oracle's position as the world's largest enterprise software company. Partners who are able to demonstrate superior product knowledge, technical expertise and a commitment to doing business with Oracle qualify for the Certified Partner levels. <http://oraclepartnernetwork.oracle.com/>.
